# Integrating Hips and Shoulders

Jocelyn Olivier CMT, MBW

**Shoulder problems cannot be corrected** without organizing the structures supporting them. One essential component is the hips to shoulders relationships expressed in Gait Patterns (forward and lateral), and Cloacals (forward and back diagonals).

**Module 2** requires you have already completed **NMR Intro: Protocols for Low Back and Hips.**

**Place: Atlanta, Georgia**

*Location available upon registration.*

**NMR 2: Integrating Hips and Shoulders** presents quick and effective protocols to work with the organizational integrity between hip and shoulder functions. It includes a deeper look at Contralaterals, Diagonals, forward, back and side Gaits, Cloacals, and the functional integration of the big movers of the shoulders, ie. Trapezius, Latissimus, Supraspinatus, Posterior Deltoid, and Anterior Serratus with the hips and low back. Local reprogramming of shoulder functions is much easier following big system integration.
