NMR® Mod 2:

Integrating Hips and Shoulders

Jocelyn Olivier CMT, MBW

NMR 2: Integrating Hips and Shoulders

presents quick and effective protocols to work with the organizational integrity between hip and shoulder functions. It includes a deeper look at Contralaterals, Diagonals, forward, back and side Gaits, Cloacals, and the functional integration of the big movers of the shoulders, ie. Trapezius, Latissimus, Supraspinatus, Posterior Deltoid, and Anterior Serratus with the hips and low back. Local reprogramming of shoulder functions is much easier following big system integration.
