**Shoulder problems cannot be corrected
without organizing the structures supporting
them.** One essential component is the hips to
shoulders relationships expressed in Gait Patterns
(forward and lateral), and Cloacals (forward and
back diagonals).

NMR 2: Integrating Hips and Shoulders
presents quick and effective protocols to work with
the organizational integrity between hip and
shoulder functions. It includes a deeper look at
Contralaterals, Diagonals, forward, back and side
Gaits, Cloacals, and the functional integration of the
big movers of the shoulders, ie. Trapezius,
Latissimus, Supraspinatus, Posterior Deltoid, and
Anterior Serratus with the hips and low back. Local
reprogramming of shoulder functions is much
easier following big system integration.

Module 2 requires you have already completed
NMR Intro: Protocols for Low Back and Hips.
Exceptions must be approved by Jocelyn Olivier.

is the developer of NeuroMuscular Reprogramming®.
She has been a visionary and innovator in the fields of
rehabilitation and education for over 40 years.

As founder and director of the Institute of Conscious
BodyWork, Alive & Well! Jocelyn has trained over 10,000
senior bodywork practitioners. She has advanced our
understanding of the value of
integrating neurological repro-
gramming with functional
re-education to accomplish the
highest level of recovery from
acute and chronic injuries.
