

Shoulder problems cannot be corrected without organizing the structures supporting them. One essential component is the hips to shoulders relationships expressed in Gait Patterns (forward and lateral), and Cloacals (forward and back diagonals).

The concepts and principles of NeuroMuscular Reprogramming NMR® Mod 2: **Integrating Hips and Shoulders**

Jocelyn Olivier CMT, MBW

NMR 2: Integrating Hips and Shoulders

presents quick and effective protocols to work with the organizational integrity between hip and shoulder functions. It includes a deeper look at Contralaterals, Diagonals, forward, back and side Gaits, Cloacals, and the functional integration of the big movers of the shoulders, ie. Trapezius, Latissimus, Supraspinatus, Post Delt, and Anterior Serratus with the hips and low back. Local reprogramming of shoulder functions is much easier following big system integration.
